Year: 2001-2004
Make: Hyundai
Model: Santa Fe

INSTALLATION INSTRUCTIONS

What's in the Box: (1) Mesh Grill Piece, (16) Ties, (8) Clips.

Tool List: Wire Cutters.

Upper Bumper Mesh Installation:

1. Test fit the insert to ensure proper fit then open and prop the hood.
2. Gain access to behind the top grill area.
3. Place a clip through the mesh, near the outside perimeter of the grill. For best results, you should start from the center and work your way to the sides. You may need to straighten or bend the clip to manipulate it a way that will make it feed through properly.

The clip should straddle the mesh and also be near a horizontal bar on the factory grill.

4. Run a cable tie through the holes in the clip. The tie should straddle on of the horizontal bars.

5. The back of the grill, clip, and tie area should look like this.

6. Loosely attach the tie together allowing enough movement in the insert to lift up, in order to install more clips.

7. Repeat steps 3-6 for the rest of the insert.

8. Once you have all the clips and ties in place, then pull the ties tight and cut off the ends.

10. Close your hood, test to make sure the grill install is safely secure, and enjoy.

Lower Bumper Mesh Installation:

This can be installed without bumper removal. Follow the general guidelines in the video here on how to install the lower bumper mesh: <http://www.youtube.com/watch?v=0qNisv7Aey4>

PLEASE NOTE: The instructions provided are the suggested installation method. If you feel that the installation instructions are inadequate or unsafe then please feel free to develop your own installation techniques that fit your exact needs. customcargrills.com llc is not liable for any personal or property damage resulting from our products.
